

ABAC-TEAM, NIVIUK'S COMPETITION TEAM

Photo : AH Studio

Some of the ABAC Team under the watchful eye of Niviuk's founder, Dominique Cizeau.

At the 2006 Coupe Icare the manufacturer Niviuk together with the French company ABAC engineering, whose portfolio covers a wide range of engineering disciplines, decided to create a group of competition pilots, the ABAC Team, with the aim of boosting the pilot's careers.

This initiative gave continuity to the work that ABAC, along with Sandie Cochapain, le Pole Espoir de Font Romeu*, le Pole de France, Raúl Rodriguez and Jean-Marc Caron had been doing since 1999. A high level team of young people and professionals, the ABAC Team has the ethos 'be more than yourself with the Niviuk team'. They compete in the most important and prestigious events in the world, flying the Spanish manufacturer's latest models, like the Icepeak 7 Pro and the Drifter harness. Its experience is passed onto the development team at Niviuk. Since its creation, the ABAC Team has wanted to 'set the standard for competition teams' and its list of achievements is proof of their success. The ABAC Team also wants to represent the values of those who created it.

To do great paragliding but also to invest in training and the pilot's professional career. Introducing the pilots who have been, or are currently, in the competition team: Jean-Marc Caron, Jérémie Lager, Joël Debons, Lucas Bernardin, Maxime Pinot, Simon Issenhuth, Honorin Hamard, Tim Rochas, Benoit Bayon, Laurie Genovese, Maxime Bellemin, Erwan Didriche, Petra Slivova, Elisa Houdry et Emmanuelle Zuferey.
